SUMMARY

Building energy codes specialist and full-stack developer with about a decade in California Title 24, Part 6. I lead digitization of prescriptive compliance tooling, maintain shared compliance-software infrastructure, and advise CASE / Reach Code work. Independent creator of Wattly, Title 24 BEM and compliance software currently in preparation and not publicly released.

EXPERIENCE

NORESCO

2019 – Present

Senior Energy Analyst (2024–present) · Energy Analyst III (2021–2024) · Energy Analyst II (2019–2021)

- Lead the team building California Title 24, Part 6 prescriptive compliance software — a full-stack web application used to demonstrate code requirements.
- Build a SQL database of public and private California compliance-software data so CASE teams, the CEC, and the CPUC can work from actual filings rather than anecdotes.
- Develop and maintain the XSD ruleset that functions as central infrastructure for public and private compliance tools in the state.
- Deliver a secure API for large-scale building data.
- Cultivate relationships with CEC, local government, IOUs, and CPUC Codes & Standards participants.
- Support local governments on Reach Code adoption.
- CASE subject-matter expert for the 2022, 2025, and 2028 Title 24, Part 6 cycles.
- Mentor junior staff; manage workload and contract budget; develop statements of work.

EnergySoft

2014 – 2019

Energy Analyst (2015–2019) · Intern (2014–2015)

- Building energy models for cutting-edge projects including Apple Park.
- Life-cycle cost analysis of nonresidential design options in EnergyPro.
- Managed a team of energy consultants.

INDUSTRY ENGAGEMENT

- ACEEE Summer Study 2024 paper and presentation — “21st Century Compliance: Data-Driven Solutions for Decarbonization and Equity” (coauthors Sally Blair, Jill Marver).
- CalBEM 2025 Power Talk — “Capturing the Value of BEM Data for Policy and Programs.”
- CABEC 2024 — California Energy Code compliance software framework.
- CABEC 2022 — What’s new with the 2022 Nonresidential energy code.
- CABEC 2026 (upcoming) — “AI for Energy Consultants.” cabec.org/conference2026
- Technical briefing for CEC Commissioner Andrew McAllister and senior staff on the NORESKO Codes and Standards database.

INDEPENDENT SOFTWARE

Wattly — Independent creator. Title 24 BEM / compliance software for California (performance + prescriptive). Prepared; not publicly released.

EDUCATION

- B.S. Energy Management and Design — Sonoma State University. Thermal energy management, renewable energy systems, electrical energy management.
- B.S. Computer Science — Colorado State University. Software development, database management, software engineering, computer architecture.

SKILLS
