Summary

Full-stack developer and Title 24 Part 6 subject matter expert with 12 years of experience in building energy codes and compliance software. Builds tools, training, and resources for Energy Code Ace, supports future code development (Title 24 Part 6, WSEC), and applies generative AI across software, energy modeling, and knowledge workflows as an early adopter since 2022. Founder of Wattly, a Title 24 BEM and Energy Code compliance platform currently awaiting CEC certification for the 2025 Energy Code.

Experience

NORESCO

2019 to present

Senior Energy Analyst, 2024 to present. Energy Analyst III, 2021 to 2024. Energy Analyst II, 2019 to 2021.

Software

- Lead an interdisciplinary team of software developers and subject matter experts to build the Virtual Compliance Assistant, a Title 24 Part 6 form completion tool.
- Develop and maintain data pipelines in AWS used to inform future policy decisions for building energy codes, including a secure API for large-scale building data.
- Develop and maintain the XSD ruleset used as shared infrastructure for Energy Code compliance tools in the state of California.

Building Energy Codes & Leadership

- Shape product design, stakeholder training, and technical resources for the Energy Code Ace platform as a Title 24 Part 6 SME.
- Support development of future versions of energy codes and standards such as California's Energy Code (Title 24 Part 6) and the Washington State Energy Code (WSEC) as a Codes and Standards Enhancement (CASE) subject matter expert for Title 24 Part 6 code development in the 2022, 2025, and 2028 cycles.
- Work with the California Energy Commission (CEC), local governments, IOUs, and CPUC Codes and Standards to support energy code compliance. Support Reach Code adoption for local governments.
- Manage a team of direct reports, including career development and growth. Delegate workload, provide feedback, and lead internal trainings on building science, software development, and AI tooling.

EnergySoft

2014 to 2019

Energy Analyst, 2015 to 2019. Intern, 2014 to 2015.

- Built building energy models for nonresidential projects including Apple Park.
- Developed EnergyPro life-cycle cost analyses. Managed consultants.

Independent projects

- Wattly. Founder. Title 24 BEM and Energy Code compliance software for California, covering performance and prescriptive compliance. Currently awaiting CEC certification for the 2025 Energy Code. Releasing in private beta.

Talks and publications

- CABEC 2026. AI for Energy Consultants.
- CalBEM 2025. Capturing the Value of BEM Data for Policy and Programs, Power Talk.
- ACEEE Summer Study 2024. 21st Century Compliance: Data-Driven Solutions for Decarbonization and Equity, Blair and Marver.
- CABEC 2024. California Energy Code compliance software framework.
- CABEC 2022. What is new with the 2022 Nonresidential energy code.
- CEC briefing. Commissioner McAllister and technical staff on the NORESCO compliance database.

Education

- B.S. Computer Science, Colorado State University
- B.S. Energy Management and Design, Sonoma State University

Skills

Software: JavaScript, React, Python, C#, .NET, MySQL, PostgreSQL, Azure, AWS, Git, Django, Cursor.

Energy modeling: EnergyPro, CBECC, Wattly, OpenStudio, EnergyPlus.

Domain: Title 24 Part 6 and Part 11, WSEC, BEM, prescriptive and performance compliance, CASE, Reach Codes.
