SUMMARY

Full-stack developer with about a decade in California building energy-code software. I lead a team shipping Title 24, Part 6 compliance tooling — web apps, SQL, XSD rulesets, and APIs — and I independently build Wattly (prepared, not publicly released).

Looking for software roles where energy-code domain knowledge is an advantage, not a side note.

EXPERIENCE

NORESCO

2019 – Present

Senior Energy Analyst (2024–present) · Energy Analyst III (2021–2024) · Energy Analyst II (2019–2021)

- Lead developers building a full-stack web application for Title 24, Part 6 prescriptive compliance.
- Design and maintain a SQL database that collects public and private California compliance-software data for CASE, CEC, and CPUC decision-makers.
- Develop and maintain the XSD ruleset used as central infrastructure for public and private CA compliance tools.
- Build a secure API for large-scale building-data transmission.
- Work with CEC, local governments, IOUs, and CPUC Codes & Standards; support Reach Codes; CASE SME for 2022 / 2025 / 2028.

EnergySoft

2014 – 2019

Energy Analyst (2015–2019) · Intern (2014–2015)

- Energy models for projects including Apple Park.
- Nonresidential LCCA in EnergyPro; managed consultants.

SELECTED WORK

- **Wattly** — Independent creator. Title 24 BEM / compliance software for California (performance + prescriptive). Modern desktop/web direction. Prepared; not publicly launched.
- **Title 24 prescriptive compliance platform** — Lead, NORESCO. Full-stack product for demonstrating Part 6 prescriptive requirements.
- **NRCC-LTS form tool** — Personal full-stack experiment (Flask, JavaScript, MySQL, Azure). Source: [GitHub](#)

TALKS & PUBLICATIONS

- CABEC 2026 (upcoming) — “AI for Energy Consultants.” cabec.org/conference2026
- CalBEM 2025 — Power Talk: “Capturing the Value of BEM Data for Policy and Programs.”
- ACEEE Summer Study 2024 — “21st Century Compliance: Data-Driven Solutions for Decarbonization and Equity” (with Sally Blair and Jill Marver).
- CABEC 2024 — California Energy Code compliance software framework.
- CABEC 2022 — What’s new with the 2022 Nonresidential energy code.

EDUCATION

- B.S. Computer Science — Colorado State University
- B.S. Energy Management and Design — Sonoma State University

SKILLS

C# / .NET, React, TypeScript, Python, SQL, Azure, HTML/CSS, Git/GitHub, APIs, XSD / rulesets, Title 24 Part 6, BEM. C# / .NET and TypeScript reflect current independent Wattly work and are newer than the October 2024 published PDF.
